# Transforming regulatory activities with AI

*8 May 2025*

•

Yves Jacob

Head Regulatory Europe

*“Our ambition is to become the first pharma company powered by artificial intelligence at scale, giving our people tools and technologies that focus on insights and allow them to make better everyday decisions.”*

**Paul Hudson**  
**CEO Sanofi**  
*(June 2023)*

Becoming the first  
biopharma  
company  
*powered by AI at-  
scale*

sanofi

To achieve our ambition, *we're building on 3 pillars:*

**1** *Expert AI*

Competitive Edge

Apply **massive computing power**, machine learning and trained algorithms to optimize drug development and complex manufacturing processes.

**2** *Snackable AI*

Plai

**Easy-to-use and interpret AI** for daily workflow to make better decisions and allocate resources more efficiently.

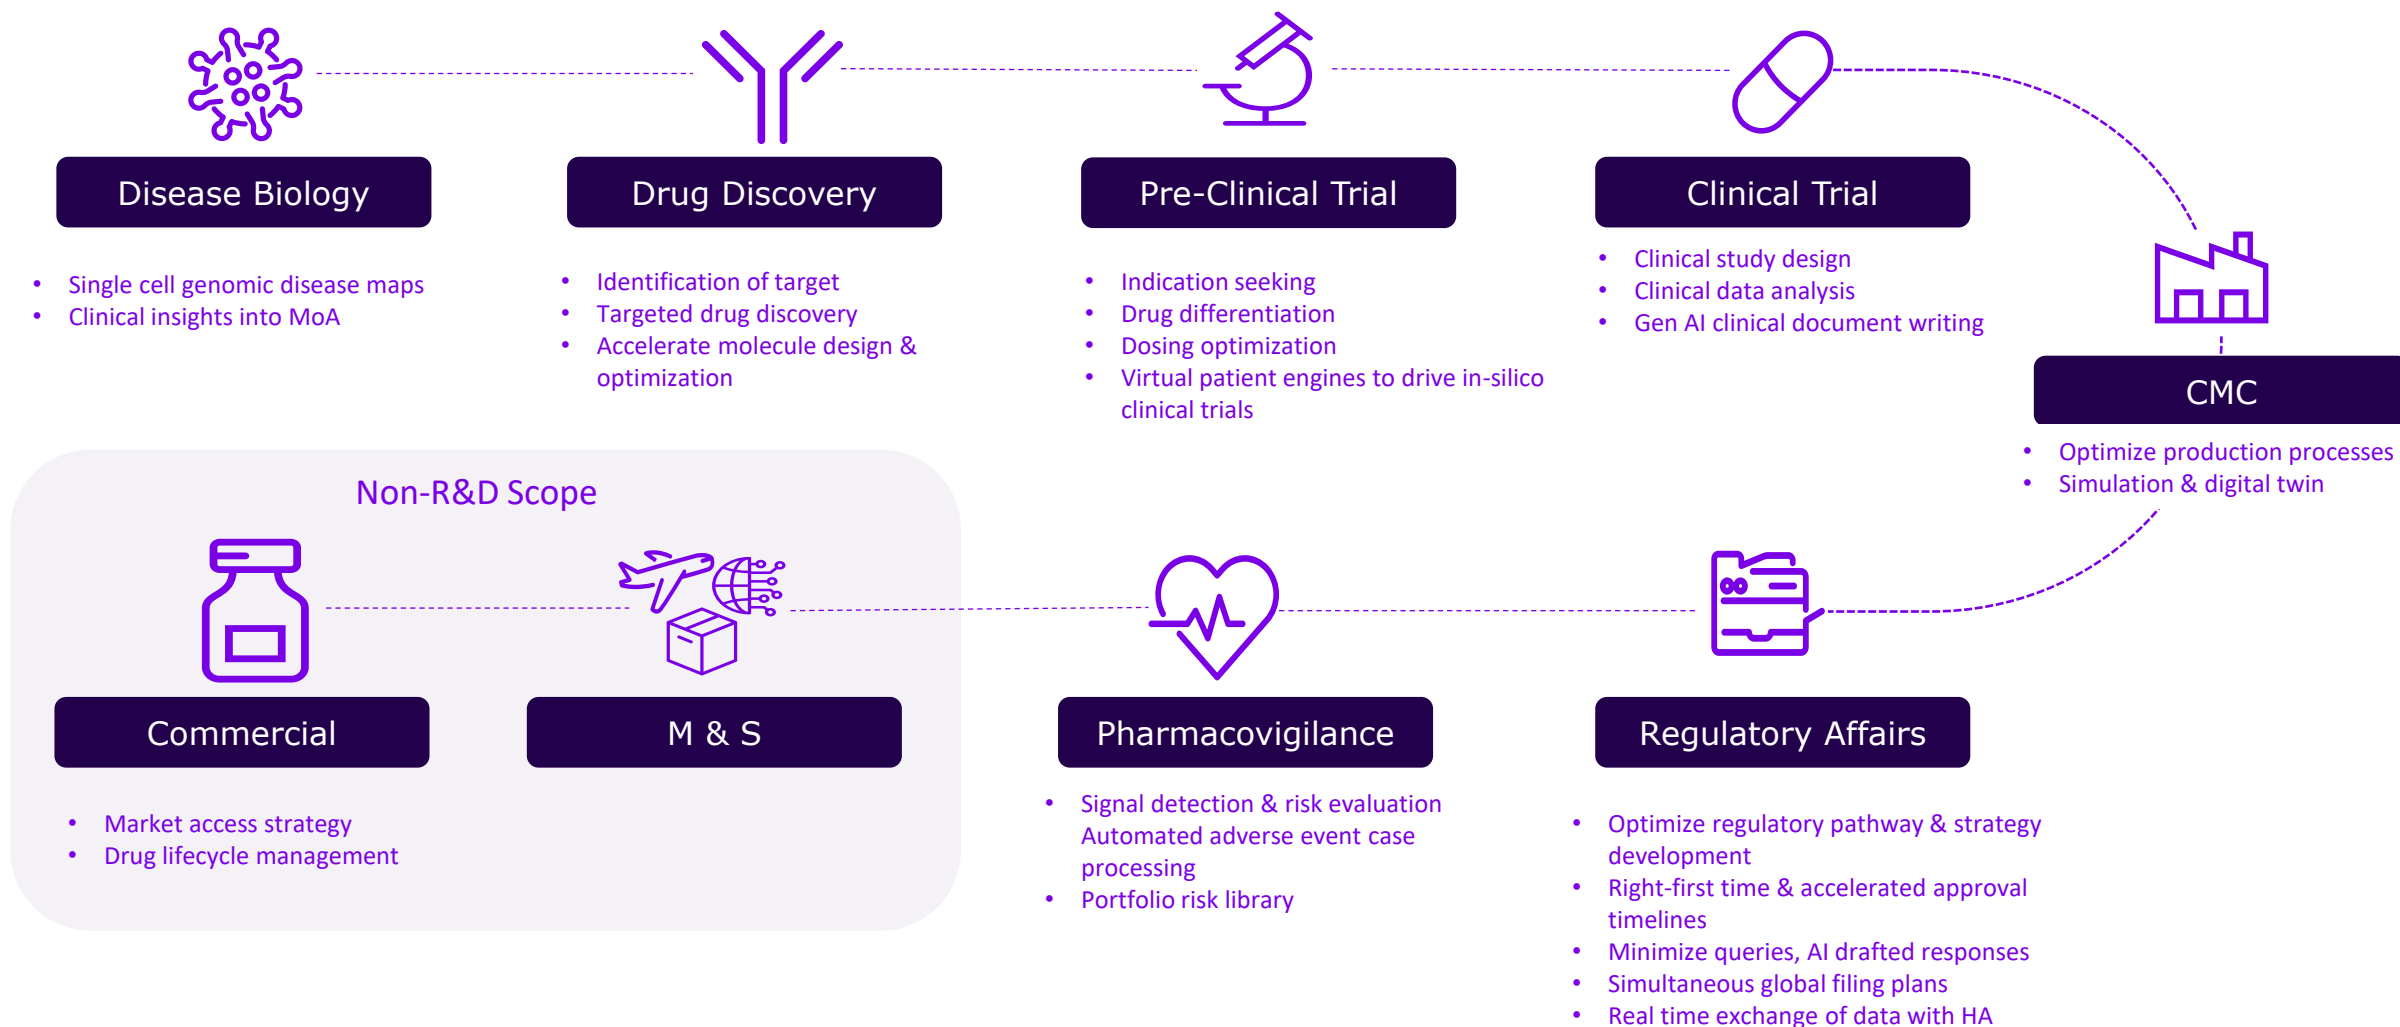

**3** *Generative AI*

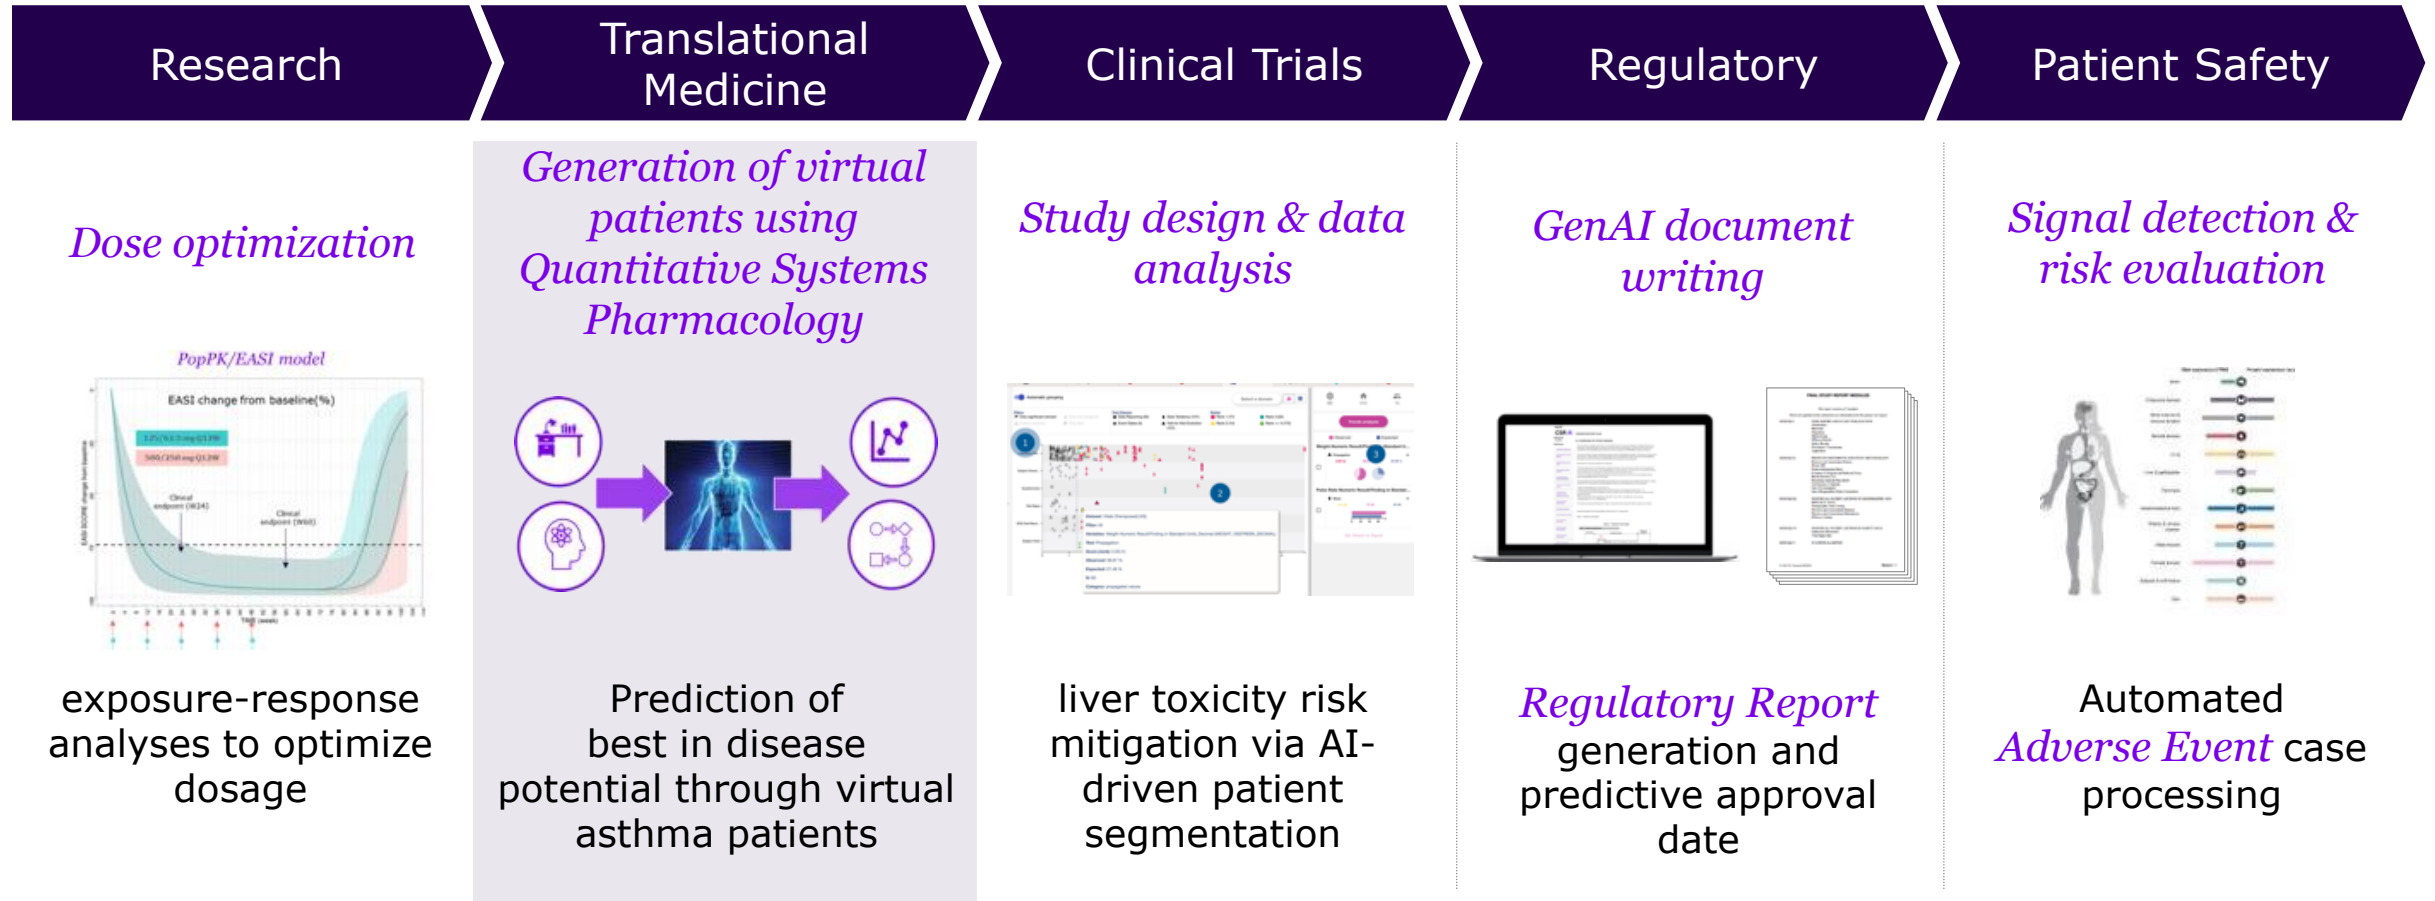

Company-Wide

A subset of AI that specializes in **learning patterns from existing data** to generate entirely new content to improve productivity.

# AI-Powered R&D Organization Across The Value Chain

# Leading digital/AI capabilities to *enhance* R&D productivity

# CTD content generation | *Interest for Regulatory affairs*

2024-04-10 15:34:56

*Example: CSR authoring*

### Use Case Clinical Study Reports

**70%**

Final version of content generated in **10 minutes or less**

**35-65%**

Writing **time efficiencies** on tested document sections

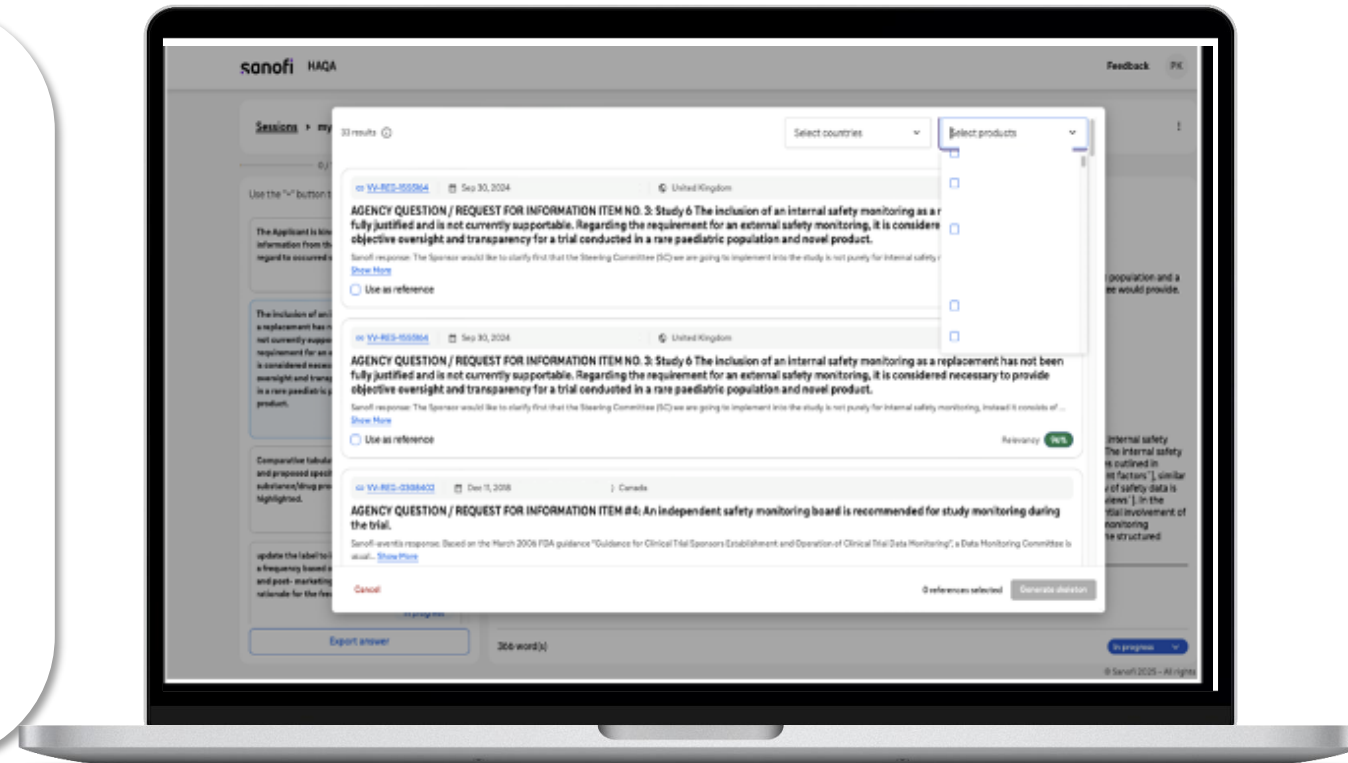

- Enhance *Efficiency*
- *Accelerate* draft document creation
- *Improve* consistency
- *Inform* decision making
- *Automate* Repetitive Tasks

# AI to *facilitate Common Technical Documents* generation starting with Health Authority Questions

- ✓ *Leverage a 100K+ HAQ database* to capitalize on previous similar queries
- ✓ *Facilitate analysis* of large datasets providing valuable insights that can *inform decision-making* processes
- ✓ *Simplify* authoring process
- ✓ *Assist* document drafting with full Human oversight

# AI translation | *OneTranslate*

## Artificial Intelligence

Leverages AI, machine learning, and Sanofi translation memory

## Self-Service Translation

End-user initiates translation and performs machine translation quality checks

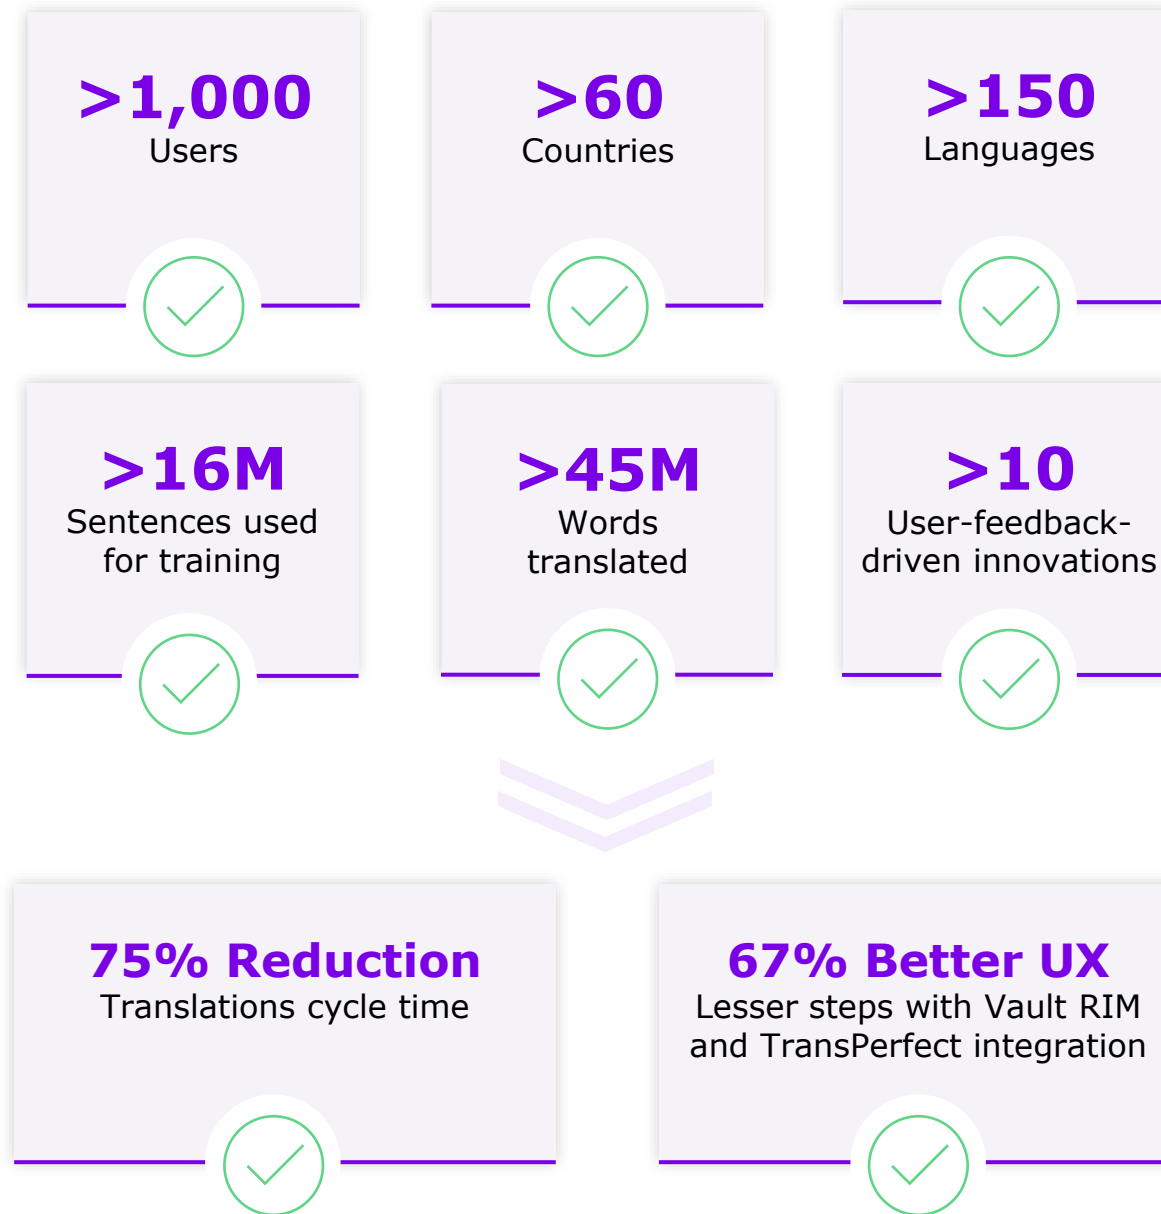

## Continuous Improvement

Updates implemented based on user feedback for emerging innovation and improvement

# Achievements

*OneTranslate*

# Product Quality Review

Current lead time: **~130 hours per PQR**

Manual

Data collection

Content drafting and formatting,  
data analysis, review & closure

Final review &  
Approval

GenAIR

With GenAIR: **~15-45 hours per PQR** (~65-85% efficiency)

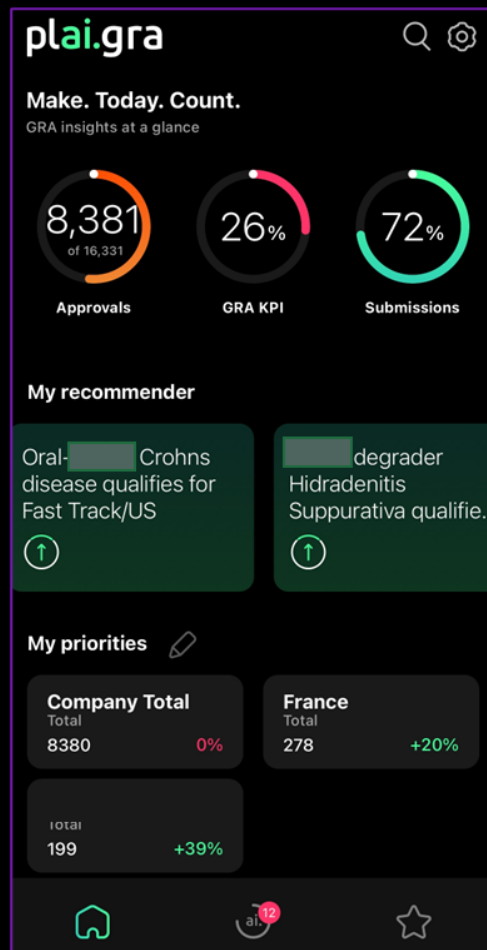

Automated data collection, content drafting  
and data analyses

Review focused on key analyses  
and insights generation, where  
human expertise is required

5min

Note: time efficiencies demonstrated during first GenAI trial on PoC Dec. 2023

# Plai : Interest for Regulatory affairs

## Recommendations

From strategy to ops

## Predictions

Near real-time

## 360° view

Across Sanofi

## Portfolio

Simulations

## Enhancing

Decision making & planning

**+1bn data** points correlated into Plai

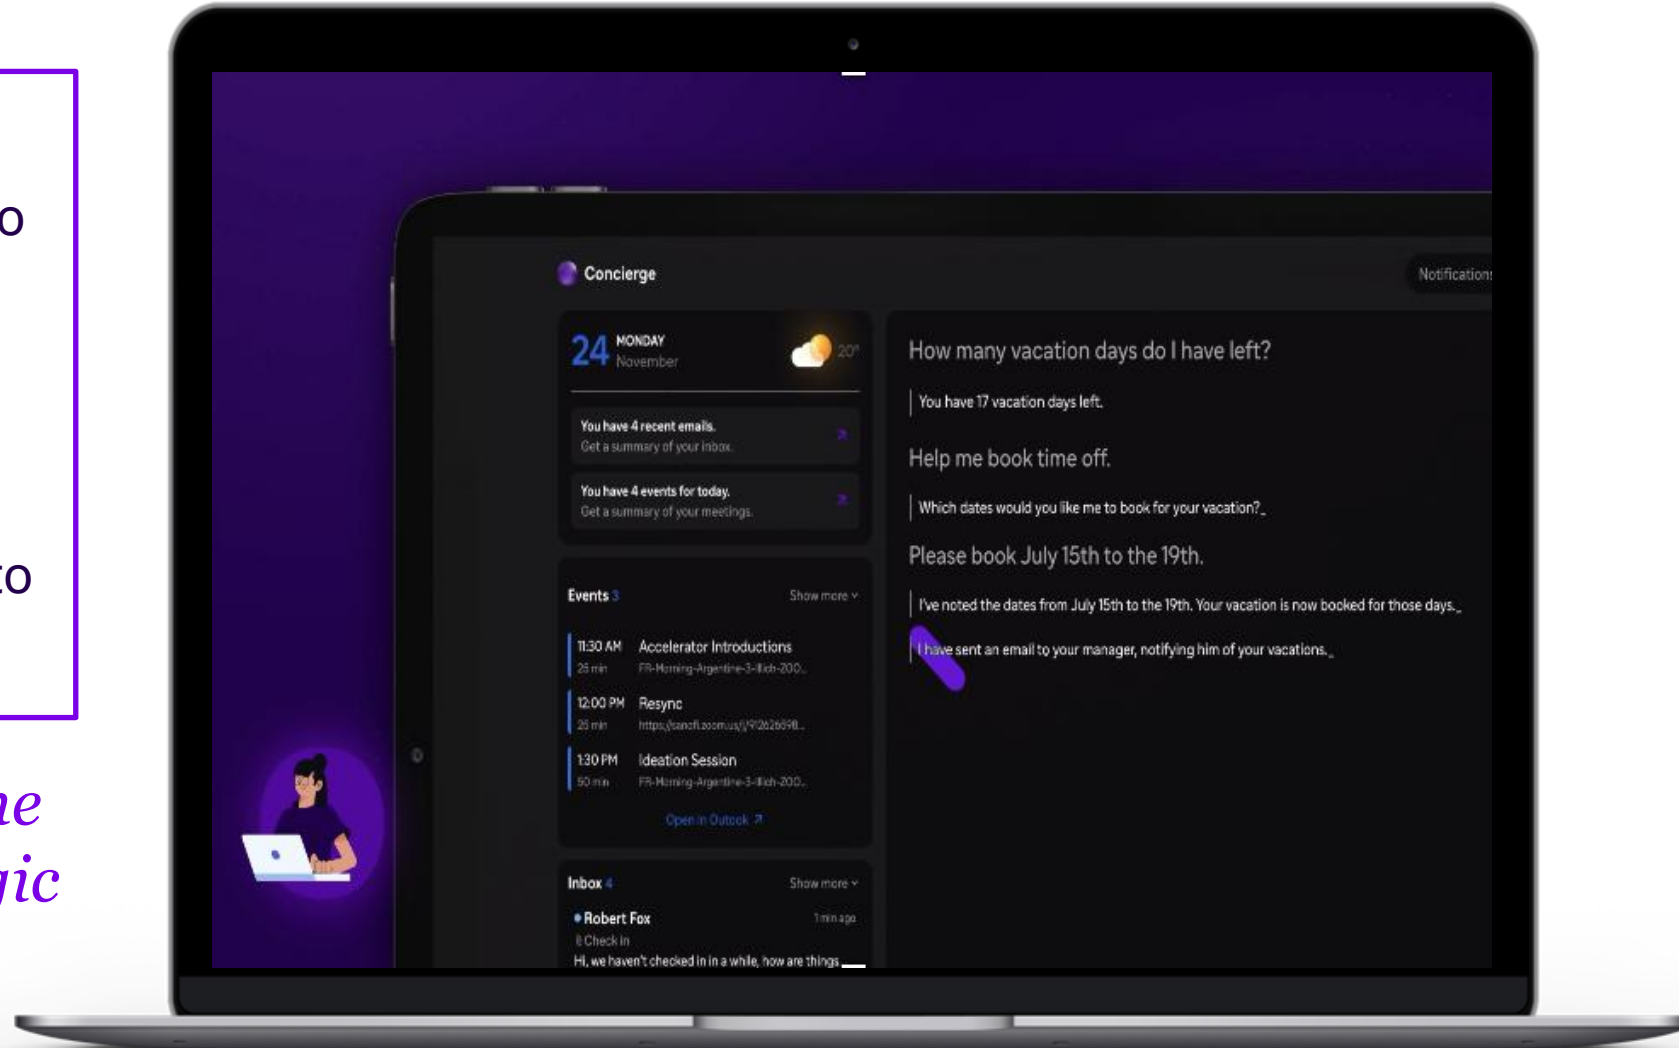

- AI-generated recommendations to identify opportunities for regulatory strategy acceleration
- Predict HA approval
- Improve planning out of stock prediction to inform shortage notifications
- Inform strategy and timelines based on historical data
- Democratize our data to unlock our potential

# Employee experience | *Interest for Regulatory affairs*

- Copilot MS365
- AI concierge in your pocket to empower employee with a personalized experience to ease their day to day
- Easily retrieve information within your company
- Leverage GenAI capabilities to facilitate your everyday work

*Save time spent on mundane tasks to focus on the strategic value*

# Responsible AI at Sanofi for Everyone (RAISE)

All of our projects follow our Responsible AI policy to ensure they meet our moral & ethical standards and protect our people, patients and customers.

Robust **governance and accountability framework**, with a mission to enable Sanofi to be the first AI-powered biopharma company at scale by **mitigating AI-related risks**

# Achieving Success Through Ambitious Goals and Organizational Engagement

*We must rethink and adapt our processes as we pioneer the early stages of GenAI.*

## Rethink the process

Take advantage of GenAI capabilities

## Build new skills

Investing early in employee growth

## Data is key

AI is only as powerful as the data you give it

## Change ready mindset

Foster a culture of innovation and adaptability

## Continuous improvement

Constantly evolving technologies

Thank you

**sanofi**
